

Blitzrechnen – Paket für Klasse 1

Zerlegen – Grundlegung

Zerlegen

(→ Schülerbuch, Seite 26)

Grundlage ist eine gegliederte Reihe von bis zu 9 Plättchen. Die Reihe wird mit einem Stift in zwei Teile gelegt. Die Anzahl der Plättchen links davon wird genannt. Das Kind bestimmt die Anzahl der Plättchen rechts davon. Variante: Das Kind nennt die Anzahlen beider Teile als Plusaufgabe.

Das Zahlenbuch

Blitzrechnen – Paket für Klasse 1

Plus- und Minusaufgaben – Grundlegung

Plusaufgaben

Plusaufgaben legen, nennen und rechnen.

4 + 3 = 7
3 + 4 = 7

1 mehr als 3 + 3.
1 weniger als 4 + 4.
5 + 3 hilft mir.

Plusaufgaben

(→ Schülerbuch, Seite 65)

Am leeren Zwanzigerfeld werden rote und blaue Plättchen gelegt. Das Kind bestimmt die Summe. Um den Lege-aufwand zu verringern, sollten die Aufgaben fortlaufend abgewandelt werden. Aus $4 + 3$ kann man z. B. die Aufgaben $4 + 4$, $5 + 4$, $5 + 2$ machen. Auf diese Weise werden die Aufgaben beziehungsreich gelernt.

Minusaufgaben

Minusaufgaben legen, nennen und rechnen.

14 - 3 = 11

4 - 3 = 1
14 - 3 = 11

1 mehr als 14 - 4.
1 mehr als 13 - 3.

Minusaufgaben

(→ Schülerbuch, Seite 85)

Am Zwanzigerfeld wird eine Anzahl blauer Plättchen gelegt, und dann werden einige Plättchen etwas weiter weg gerückt („minus“). Das Kind bestimmt die Anzahlen aller und der weggenommenen Plättchen und rechnet die zugehörige Minusaufgabe. Auch diese Aufgaben sollten fort laufend abgewandelt werden.

Plus- und Minusaufgaben
